

Stop by Booth #501

Learn about these high-performance Phoenix Software products...

A fully supported derivative work leveraging IBM's JES3 licensed source code. Created with customers in mind, JES3plus™ is an alternative to a costly JES2 conversion which provides for a trivial migration to a solution that is the same only better.

A modern tool for managing your z/OS® JESplex. (E)JES includes cutting-edge components such as a browser based interface, Zowe conformant API and CLI, and guided z/OSMF installation.

A z/OS application profiler that generates reports to help tune applications by locating specific sections of your code that are the biggest CPU consumers.

Enter to win a designer backpack...

We'll be raffling off two Tumi backpacks. Drop your business card in the box for a chance to win one of them.

Drawings will be held Tuesday at 6 PM and Wednesday at 11:30 AM. Winners must pick up backpack by the end of the Expo on Wednesday, February 26.
